

BOE220 - SA310R2 – Business Objects Enterprise: Administering Servers - Windows

Duration: 3 days

Delivery Type

- Instructor-led Classroom

Audience

- The target audience for this course is System architects/Administrators who are responsible for setting up and maintaining a BusinessObjects Enterprise platform.

Prerequisites:

Essential

- * Prerequisite Education (To be successful, you must have attended the following offerings or have the equivalent knowledge:)
- BusinessObjects Enterprise XI R1/R2: Administering Users and Content with the CMC
- * Prerequisite Knowledge/Experience (To be successful, you must have working knowledge of:)
- Tasks involved in supporting BusinessObjects Enterprise users and groups access corporate data through InfoView
- BusinessObjects Enterprise account management
- BusinessObjects Enterprise content management
- BusinessObjects Enterprise security concepts
- BusinessObjects Enterprise InfoView
- NT enterprise security concepts (global & local groups, and directory structure)

Recommended

- None

Goals

- This three-day instructor-led course explains and demonstrates what each server component in BusinessObjects Enterprise does and how it is configured.
- You will install and configure each component and learn how information flows from server to server for system processes such as logging on to the system, scheduling reports and viewing reports.
- You will learn to use the Central Management Console (CMC) and the Central Configuration Manager (CCM) to manage and configure the servers and will also practice troubleshooting system problems when they arise.
- The business benefit of this course is that it provides a foundation for System Architects/Administrators who are responsible for setting up and maintaining a BusinessObjects Enterprise platform.
