

## **BOE310 - SA210V3.0 - BusinessObjects Enterprise XI 3.0: Administration and Security**

**Duration:** 2 days

### **Delivery Type**

- Instructor-led Classroom

### **Audience**

- The target audience for this course is system architects/administrators who are new to BusinessObjects Enterprise and will be responsible for maintaining BusinessObjects Enterprise users, groups, and objects in their organization.

### **Prerequisites:**

#### Essential

- \* Prerequisite Education
- Not applicable for this offering.
- \* Prerequisite Knowledge/Experience (While not required for this course, experience with these products or technologies will be helpful:)
- Windows conventions
- Familiarity with Windows Server 2000/2003 administration
- Windows Server 2000/2003 security concepts (global/local groups, and directory structure)

#### Recommended

- None

### **Goals**

- This two-day instructor-led course explains how to perform the tasks in the central management console (CMC).
- These tasks involve supporting BusinessObjects TM Enterprise users and groups so they can access corporate data through the web portal in BusinessObjects Enterprise.
- This corporate data can take the form of Crystal Reports, BusinessObjects Web Intelligence, or Desktop Intelligence documents, Voyager reports, program objects, object packages, and popular third-party objects, such as Microsoft Word and Excel files, among others. Please note: this course does not discuss maintaining BusinessObjects Enterprise servers, which is taught in the BusinessObjects Enterprise XI 3.0: Administering Servers – Windows course.
- The business benefit of this course is that it provides a foundation for System Architects/Administrators to effectively manage both users and content on the BusinessObjects Enterprise platform.
