

BusinessObjects Performance Manager: Measuring Performance COURSE CODE: BOM210 - PM350R2

Duration: 1 day

Delivery Type

- Instructor-led Classroom

Audience

- The target audience for this course is Performance Management designers who are comfortable working in Dashboard Manager and need to create goal-based analytics, strategies and alerts to display for business users through corporate dashboard applications.

Prerequisites:

Essential

- * Prerequisite Education (To be successful, you should have previously attended the following offerings:)
- BusinessObjects Dashboard Manager: Designing Dashboards
- * Prerequisite Knowledge/Experience
- Not applicable for this offering.

Recommended

- None

Goals

- BusinessObjects™ Performance Manager XI enables you to create scorecards that, by aligning with Key Performance Indicators (KPIs), track performance across the enterprise.
- Building on existing BusinessObjects Dashboard Manager knowledge, this course provides demonstrations and hands-on activities that take you from building goals to automating goal-based alerts through rules.
- As a business benefit, you will be moving beyond tracking historical performance to mapping out strategies for future performance and aligning goals that can then be monitored against actual data.

Course Based on Software Release
