

[L-SAFE]: Leading SAFe® 5

Length : 2 Days
Delivery Method : Instructor-led (Classroom)

Course Overview

During the two-day Leading SAFe® course, attendees will gain the knowledge necessary to lead a Lean-Agile enterprise by leveraging the Scaled Agile Framework® (SAFe), and its underlying principles derived from Lean, systems thinking, Agile development, product development flow, and DevOps. They will discuss the seven competencies needed to become a Lean SAFe Enterprise.

Participants in the class gain insights into mastering Business Agility in order to thrive in the competitive market. They discuss how to establish team and technical agility and organize and re-organize around the flow of value. They also learn and practice the skills for supporting and executing PI Planning events and coordinating multiple Agile Release Trains (ARTs). Participants in the class explore the importance of adopting a customer-centric mindset and design thinking approach to agile product delivery. Learners also develop an understanding for implementing a Lean Portfolio Management function in their enterprise.

Attending the class prepares individuals to take the exam and become a certified SAFe® Agilist (SA).

Audience Profile

There are no pre-requisites for this Leading SAFe course. However, experience in software development, testing, business analysis, product, or project management, and/or experience in Scrum are recommended.

It is designed for leaders looking to better understand and execute their roles within a SAFe enterprise. It will particularly benefit:

- Executives and leaders (Managers, Directors, CIOs, VPs, etc.).
- Experienced testers wanting to better understand their role within an Agile team.
- Development, QA, and infrastructure management.
- Program and project managers.
- Product and product line management.
- Portfolio managers.
- PMOs and process leads.
- Enterprise, system, and solution architects.

At Course Completion

- Lead the transformation to Business Agility with SAFe
- Become a Lean-Agile leader
- Understand Customer needs with Design Thinking
- Enable Agile Product Delivery
- Initiate Lean Portfolio Management
