

[SAFE-SMC]: SAFe® Scrum Master Certification

Length : 2 Days
Delivery Method : Instructor-led (Classroom)

Course Overview

Do you want to demonstrate your value to SAFe teams and organisations? In this SAFe® Scrum Master course, you will learn how the role of a Scrum Master can be effectively applied to a SAFe enterprise environment.

By the end of the SAFe Scrum Master course, you will understand how to successfully plan and execute the Program Increment (PI), which is used to bring alignment throughout a SAFe organisation. You will also find out how your skills as a servant leader and coach can put lead to high performing Agile teams that then achieve maximum value at scale.

Audience Profile

This SAFe Scrum Master course can be undertaken by anyone interested in SAFe. Familiarity with Agile concepts and principles, Scrum, Kanban, eXtreme Programming (XP), and/or software and hardware development processes is highly recommended.

It is designed for:

- New and existing Scrum Masters looking to understand their role in a SAFe enterprise.
- Team Leads who wish to understand the Scrum Master role.
- SAFe Release Train Engineers who want to educate Scrum Masters about their role.

At Course Completion

- Define Scrum in a SAFe enterprise
- Enable Scrum events
- Implement effective Iteration execution
- Understand the integration with PRINCE2
- Introduce Program Increment execution
- Enable relentless improvement
- Support Agile teams for maximum results
- Support the implementation of DevOps

Course Outline
