

[CT-CySA+]: CompTIA Cybersecurity Analyst (CySA+) (Exam CS0-001)

Length : 5 Days
Delivery Method : Instructor-led (Classroom)

Course Overview

This course covers the duties of cybersecurity analysts who are responsible for monitoring and detecting security incidents in information systems and networks, and for executing a proper response to such incidents. Depending on the size of the organization, this individual may act alone or may be a member of a cybersecurity incident response team (CSIRT). The course introduces tools and tactics to manage cybersecurity risks, identify various types of common threats, evaluate the organization's security, collect and analyze cybersecurity intelligence, and handle incidents as they occur. Ultimately, the course promotes a comprehensive approach to security aimed toward those on the front lines of defense.

This course is designed to assist participants in preparing for the CompTIA® Cybersecurity Analyst+ (Exam CS0-001) certification examination. What participants will learn and practice in this course can be a significant part of participant's preparation.

In addition, this course can help participants who are looking to fulfill DoD directive 8570.01 for information assurance (IA) training. This program is designed for personnel performing IA functions, establishing IA policies, and implementing security measures and procedures for the Department of Defense and affiliated information systems and networks.

Audience Profile

This course is designed primarily for cybersecurity practitioners who perform job functions related to protecting information systems by ensuring their availability, integrity, authentication, confidentiality, and non-repudiation. This course focuses on the knowledge, ability, and skills necessary to provide for the defense of those information systems in a cybersecurity context, including protection, detection, analysis, investigation, and response processes. In addition, the course ensures that all members of an IT team—everyone from help desk staff to the Chief Information Officer—understand their role in these security processes.

At Course Completion

In this course, participants will assess and respond to security threats and operate a systems and network security analysis platform.

Pre-Requisites

To ensure participants success in this course, participants should meet the following requirements:

- At least two years (recommended) of experience in computer network security

AVANTUS TRAINING PTE LTD

80 Jurong East Street 21 #04-04 Devan Nair Institute Singapore 609607

Main Line: +65 6661 0888 | Fax: +65 6661 0886

Email: enquiries@AvantusTraining.com

- technology or a related field
- The ability to recognize information security vulnerabilities and threats in the context of risk management
- Foundation-level operational skills with some of the common operating systems for computing environments
- Foundational knowledge of the concepts and operational framework of common assurance safeguards in computing environments. Safeguards include, but are not limited to, basic authentication and authorization, resource permissions, and anti-malware mechanisms
- Foundation-level understanding of some of the common concepts for network environments, such as routing and switching
- Foundational knowledge of major TCP/IP networking protocols, including, but not limited to, TCP, IP, UDP, DNS, HTTP, ARP, ICMP, and DHCP
- Foundational knowledge of the concepts and operational framework of common assurance safeguards in network environments. Safeguards include, but are not limited to, firewalls, intrusion prevention systems, and VPNs

Participants can obtain this level of skills and knowledge by taking the following Logical Operations courses or by passing the relevant exams:

- CompTIA® A+®: A Comprehensive Approach (Exams 220-901 and 220-902)
- CompTIA® Network+® (Exam N10-006)
- CompTIA® Security+® (Exam SY0-401)

Course Outline

Module 1: Assessing Information Security Risk

Lessons

- Identify the Importance of Risk
- Assess Risk
- Mitigate Risk
- Integrate Documentation into Risk Management

Module 2: Analyzing Reconnaissance Threats to Computing and Network Environments

Lessons

- Assess the Impact of Reconnaissance Incidents
- Assess the Impact of Social Engineering

Module 3: Analyzing Attacks on Computing and Network Environments

Lessons

- Assess the Impact of System Hacking Attacks
- Assess the Impact of Web-Based Attacks
- Assess the Impact of Malware
- Assess the Impact of Hijacking and Impersonation Attacks
- Assess the Impact of DoS Incidents
- Assess the Impact of Threats to Mobile Security

AVANTUS TRAINING PTE LTD

Main Line: +65 6661 0888 | Fax: +65 6661 0886

Email: enquiries@AvantusTraining.com

www.AvantusTraining.com

- Assess the Impact of Threats to Cloud Security

Module 4: Analyzing Post-Attack Techniques**Lessons**

- Assess Command and Control Techniques
- Assess Persistence Techniques
- Assess Lateral Movement and Pivoting Techniques
- Assess Data Exfiltration Techniques
- Assess Anti-Forensics Techniques

Module 5: Managing Vulnerabilities in the Organization**Lessons**

- Implement a Vulnerability Management Plan
- Assess Common Vulnerabilities
- Conduct Vulnerability Scans
- Conduct Penetration Tests on Network Assets

Module 6: Collecting Cybersecurity Intelligence**Lessons**

- Deploy a Security Intelligence Collection and Analysis Platform
- Collect Data from Network-Based Intelligence Sources
- Collect Data from Host-Based Intelligence Sources

Module 7: Analyzing Log Data**Lessons**

- Use Common Tools to Analyze Logs
- Use SIEM Tools for Analysis

Module 8: Performing Active Asset and Network**Lessons**

- Analyze Incidents with Windows-Based Tools
- Analyze Incidents with Linux-Based Tools
- Analyze Malware
- Analyze Indicators of Compromise

Module 9: Responding to Cybersecurity Incidents**Lessons**

- Deploy an Incident Handling and Response Architecture
- Mitigate Incidents
- Prepare for Forensic Investigation as a CSIRT

Module 10: Investigating Cybersecurity Incidents**Lessons**

- Apply a Forensic Investigation Plan
- Securely Collect and Analyze Electronic Evidence
- Follow Up on the Results of an Investigation

www.AvantusTraining.com

Module 11: Addressing Security Architecture Issue

Lessons

- Remediate Identity and Access Management Issues
- Implement Security During the SDLC
