

## [AD371]: Red Hat Decision Manager and Process Automation Manager for Business Users

Length : 2 days  
Delivery Method : Instructor-led (Classroom)

### Course Overview

#### Understand and design business user rules and processes

Red Hat Decision Manager and Process Automation Manager for Business Users (AD371) teaches the core concepts and foundational skills necessary to make the most of Red Hat® Decision Manager and Red Hat® Process Automation Manager as a business user. You will learn to navigate the improved user interface for Decision Manager and Process Automation Manager, as well as how to design basic rules and business processes and define foundational case management concepts.

This course is based on Red Hat® Enterprise Linux® 7.5, Red Hat Decision Manager 7.0, Red Hat Process Automation Manager 7.0, and Red Hat® OpenShift® Container Platform 3.9.

Many organizations are interested in undergoing a digital transformation from traditional applications to process-driven applications. With Red Hat Decision Manager and Red Hat Process Automation Manager 7.0, Red Hat has introduced solutions to empower business users to develop and manage business rules and processes in a low-code environment.

### Course Summary

- Author decision tables.
- Navigate the user interface for Decision Manager and Process Automation Manager.
- Develop business processes with Business Central.
