

[SAS-EG282]: SAS Enterprise Guide 2: Advanced Tasks and Querying

Length : 2 Days
Delivery Method : Instructor-led (Classroom)

Course Overview

This course is intended for experienced SAS Enterprise Guide users who want to learn more about advanced SAS Enterprise Guide techniques. It focuses on using the Query Builder within SAS Enterprise Guide, including manipulating character, numeric, and date values; converting variable type; and building conditional expressions using the Expression Builder. This course also addresses efficiency issues, such as joining tables and using a single query to group, summarize, and filter data.

Audience Profile

Non-programmers with SAS Enterprise Guide experience, as well as experienced programmers with SAS Enterprise Guide experience

At Course Completion

Learn how to

- Use tasks to transpose, stack, rank, and create a random sample of your data.
- Use functions to convert the data type from character to numeric and from numeric to character.
- Use conditional logic in the Query Builder to create new columns.
- Use multiple value prompts.

Pre-Requisites

Before attending this course, students should understand how to do the following:

- Navigate the SAS Enterprise Guide environment.
- Create projects.
- Add data sources.
- Use tasks to accomplish basic analysis and reporting.
- Create queries.

You can gain this knowledge by taking the SAS Enterprise Guide 1: Querying and Reporting course or by completing the Getting Started tutorial in SAS Enterprise Guide. No SAS or SQL programming experience is required.

This course addresses SAS Enterprise Guide software.

Course Outline

Module 1: Working with Data in a Project

Lessons

- Working with projects.
- Accessing data.

Module 2: Transforming SAS Tables

Lessons

- Append Tables task.
- Split Columns task.
- Stack Columns task.
- Random Sample task.
- Sort Data task.

Module 3: Manipulating Data Values

Lessons

- Introduction to SAS functions.
- Manipulating numeric values.
- Manipulating character values.
- Converting data type.

Module 4: Prompting and Conditional Processing

Lessons

- Multiple values prompts.
- Range prompts.
- Conditional processing of project steps.

Module 5: Recoding Data Values

Lessons

- Recoding values.
- Recoding values based on a condition.
- Writing CASE expressions.
- Creating and applying custom formats.

Module 6: Grouping and Filtering

Lessons

- Grouping and summarizing data
- Including detail and summarized data
- Filtering summarized data in groups
