

[SAS-JCSA14]: JMP Software: A Case Study Approach to Data Exploration

Length : 1 Day
Delivery Method : Instructor-led (Classroom)

Course Overview

This course is designed as the first step for those who want to use JMP to manage, analyze, and explore data. Two case studies are used to present typical data issues that students see.

Audience Profile

Anyone who wants to use JMP to manage and analyze data

At Course Completion

Learn how to

- Import data into JMP
- Explore the data with graphs and tables
- Identify and correct data problems
- Create new columns with formulas
- Save and share graphical and numerical reports.

Pre-Requisites

Before attending this course, you should be familiar with a Macintosh or Microsoft Windows operating system.

This course addresses JMP software.

Course Outline

Module 1: Introduction

Lessons

- Introduction to JMP
- Exploring data

Module 2: Process Change Case Study

Lessons

- Importing data
- Creating new columns
- Presenting and sharing results

Module 3: Process Monitoring Case Study

Lessons

- Importing data
