AVANTUS
Challenging The Future In IT

[VMAIREMBT]: VMware AirWatch: Bootcamp

Length   : 4 Days
Delivery Method   : Instructor-led (Classroom)

Course Overview

This four-days boot camp is a combination of the VMware AirWatch®: Configure and Manage and the VMware AirWatch: Configure and Deploy Integrated Solutions courses. These courses take students from learning the foundational skills needed to configure and manage your VMware AirWatch environment to advanced operations on the VMware AirWatch platform. Students will learn how to enable containerized applications, deploy and manage corporate email, and integrate VMware AirWatch with your enterprise resources.

Product Alignment

- VMware AirWatch® Enterprise Mobility Management™

Audience Profile

VMware AirWatch administrators, IT staff, sales engineers, consultants, support and helpdesk personnel, solutions architects, solutions engineers, and VMware AirWatch installers and implementation specialists

At Course Completion

- Enroll devices in your enterprise environment, configure and update device settings over the air, and secure a diverse fleet of mobile devices
- Select the email deployment strategy that best fits your business and security requirements
- Manage internal, public, and purchased applications across managed devices
- Enable secure mobile access to content anytime, anywhere, while protecting sensitive content
- Gain insight into major platforms, including iOS, Android, and Windows 10 devices
- Configure and provision cloud deployments
- Learn VMware AirWatch best practices for mobile deployments
- Understand how to deploy and manage VMware AirWatch applications from the console
- Integrate with enterprise resources by installing the VMware Enterprise Systems Connector™
- Enable containerized applications to securely connect with back-end resources through use of VMware Tunnel™ and VMware Content Gateway
- Deploy and manage corporate email through the use of VMware AirWatch® Secure Email Gateway™

Course Outline

Module 1: Basic AirWatch Architecture

Module 2: Introduction to AirWatch

Module 3: Mobile Device Management Fundamentals

Module 4: Mobile Email Management Fundamentals

Module 5: Mobile Application Management Fundamentals

Module 6: Mobile Content Management Fundamentals

Module 7: Next Steps

Module 8: VMware Enterprise Systems Connector

Module 9: Integrate and Configure with Directory Services

Module 10: Secure Mobile Devices with Certificates

Module 11: VMware Tunnel

Module 12: VMware Content Gateway

Module 13: AirWatch Secure Email Gateway

Module 14: PowerShell Configuration

Module 15: G Suite

Module 16: Enrollment Options for MDM

Module 17: Create Web, Application, and Device Kiosks

Module 18: Reports, Analytics, and Telecom Management

Module 19: VMware Identity Manager

Module 20: AppConfig Community

Module 21: VMware Content Locker Advanced

Module 22: Next Step
