

[VMAIRIDOPS]: VMware AirWatch: Install and Deploy On-Premise Solutions

Length : 1 Day
Delivery Method : Instructor-led (Classroom)

Course Overview

This one-day course is designed to equip students with the skills to install, configure, and upgrade an on-premise VMware AirWatch® server. Students will have access to hands-on labs and learn upgrade options and strategies, as well as how to troubleshoot common installation and upgrade problems. Advanced installation techniques are discussed, including the use of high availability and redundancy.

Product Alignment

- VMware AirWatch® Enterprise Mobility Management™

Audience Profile

VMware AirWatch administrators, IT staff, sales engineers, consultants, support and helpdesk personnel, solutions architects, solutions engineers, and VMware AirWatch installers and implementation specialists

At Course Completion

- Identify important installation and upgrade prerequisites
- Learn to install, configure, and upgrade an on-premise VMware AirWatch server
- Discuss the benefits of using advanced installation techniques, including the use of high availability and enabling redundancy through multiserver configurations
- Review and recommend appropriate upgrade options and strategies
- Troubleshoot common installation and upgrade problems

Accreditations

This course prepares students for the following accreditation:

- VMware AirWatch Expert Accreditation: Enterprise Mobility

Pre-Requisites

This course requires completion of the following course:

- VMware AirWatch: Configure and Deploy Integrated Solutions

AVANTUS TRAINING PTE LTD

80 Jurong East Street 21 #04-04 Devan Nair Institute Singapore 609607
Main Line: +65 6661 0888 | Fax: +65 6661 0886
Email: enquiries@AvantusTraining.com
www.AvantusTraining.com

One of the following certifications is required:

- VMware AirWatch Professional Accreditation: Enterprise Mobility
- AirWatch Technical Post-Sales Cloud Professional

Course Outline

Module 1: Advanced AirWatch Architecture

Module 2: Prepare for Installation

Module 3: Install the AirWatch Application

Module 4: Install Reports

Module 5: Perform Post-Installation Configuration and Verification

Module 6: High Availability and Disaster Recovery Configuration

Module 7: Prepare an Environment for an Upgrade

Module 8: Perform an Upgrade

Module 9: Complete Post-Upgrade Environment Verification

Module 10: Troubleshoot Common Issues
