

[VMVROICMV8]: VMware vRealize Operations: Install, Configure, Manage [V8]

Length : 5 Days
Delivery Method : Instructor-led (Classroom)

Course Overview

This five-day course covers advanced capabilities like customizing alerts, views, reports, and dashboards and explains the architecture and different ways of deploying VMware vRealize® operations. This course explains certificates, capacity concepts, and workload optimization with real-world use cases and covers troubleshooting using dashboards and how-to manage compliance and configurations. The course also covers management packs such as those for or in the SDDC Management Health solution, Storage Devices Management Pack, and AWS Management Pack.

In general, this course explains how to use and configure most of the new features and enhancements in vRealize version 8.0.

Product Alignment

- VMware vSphere® 6.7 U3
- VMware vRealize® Operations Manager™ 8.0
- VMware vRealize® Lifecycle Manager™ 8.0

Audience Profile

Experienced system administrators, system integrators, and consultants responsible for designing, implementing, and customizing vRealize Operations.

At Course Completion

- Identify features and benefits of VMware vRealize® Operations™
- Design, size, and deploy a vRealize Operations cluster
- Identify the types of nodes and their roles in a vRealize Operations cluster
- Recognize how to use vRealize Operations components to build scalability and availability
- Use interface features to assess and troubleshoot operational issues
- Create policies to meet the operational needs of your environment
- Recognize effective ways to optimize performance, capacity, and cost in data centers
- Troubleshoot and manage issues and configurations using alerts and dashboards
- Use Telegraf to monitor operating systems and applications
- Create custom alert definitions, reports, and views
- Create custom dashboards using the dashboard creation canvas

AVANTUS TRAINING PTE LTD

www.AvantusTraining.com

- Configure widgets and widget interactions for dashboards
- Create super metrics
- Set up users and user groups for controlled access to your environment
- Extend the capabilities of vRealize Operations by adding management packs and configuring solutions
- Monitor the health of the vRealize Operations cluster by using self-monitoring dashboards

Pre-Requisites

This class requires completion of one of the following courses:

- VMware vSphere: Install, Configure, Manage [V6.7]
- VMware vSphere: Optimize and Scale [V6.7]

Course Outline

Module 1: Course Introduction

Lessons

- Introductions and course logistics
- Course objectives

Module 2: User Interface Enhancements

Lessons

- Describe how to use vRealize Operations to manage the software-defined data center
- Identify features and benefits of vRealize Operations

Module 3: Deploying vRealize Operations

Lessons

- Design and size a vRealize Operations cluster
- Install a vRealize Operations cluster
- Configure a vRealize Operations cluster for high availability
- Describe different vRealize Operations deployment scenarios
- Describe how to use vRealize Lifecycle Manager to deploy vRealize Operations

Module 4: vRealize Operations Architecture and Certificates

Lessons

- Describe the functions of the components in a vRealize Operations node
- Identify the types of nodes and their roles in a vRealize Operations cluster
- Recognize how a node's components interact to achieve scalability and availability
- Identify ways that data is collected and analyzed by vRealize Operations
- Describe vRealize Operations certificates

Module 5: vRealize Operations Concepts and Policies

Lessons

AVANTUS TRAINING PTE LTD

80 Jurong East Street 21 #04-04 Devan Nair Institute Singapore 609607

Main Line: +65 6661 0888 | Fax: +65 6661 0886

Email: enquiries@AvantusTraining.com

www.AvantusTraining.com

- Identify the tasks that can be performed in the administration and product user interfaces
- Describe dashboards and their usage
- Use tags to group objects
- Create policies for various types of workloads
- Explain how policy inheritance works

Module 6: Performance Optimization

Lessons

- Assess the performance of your environment to determine which data centers need optimization
- Define the business and operational intents for a given data center
- Automate the process of optimizing and balancing the workloads in data centers
- Report on the results of optimization efforts

Module 7: Capacity Optimization and Costing

Lessons

- Define capacity planning terms
- Understand capacity planning models
- Assess the overall capacity of a data center and identify optimization recommendations
- Recognize options for rightsizing virtual machines (VMs)
- Run what-if scenarios for adding workloads to a data center
- Run what-if scenarios to plan the migration of workloads to the public cloud

Module 8: Managing Configurations and Troubleshooting Pillars

Lessons

- Recognize how to troubleshoot issues by monitoring alerts
- Use step-by-step workflows to troubleshoot different vSphere objects
- Assess your environment's compliance to standards
- View the configurations of VMware vSphere® objects in your environment

Module 9: Operating System and Application Monitoring

Lessons

- Recognize how the Service Discovery manager and Telegraf fits into the vRealize Operations OS and app monitoring
- Deploy the Application remote collector
- Monitor the operating system and applications by using Telegraf

Module 10: Custom Alert Definition

Lessons

- Create symptom definitions
- Create recommendations, actions, and notifications
- Create alert definitions that monitor resource demand in hosts and VMs

AVANTUS TRAINING PTE LTD

80 Jurong East Street 21 #04-04 Devan Nair Institute Singapore 609607

Email: enquiries@AvantusTraining.com

www.AvantusTraining.com

Module 11: Custom Views and Reports**Lessons**

- Build and use custom views in your environment
- Create custom reports for presenting data about your environment

Module 12: Custom Dashboards**Lessons**

- Create dashboards that use predefined and custom widgets
- Configure widgets to interact with other widgets and other dashboards
- Configure the Scoreboard widget to use a metric configuration file
- Manage dashboards by grouping dashboards and sharing dashboards with users

Module 13: Super Metrics**Lessons**

- Recognize different types of super metrics
- Create super metrics and associate them with objects
- Enable super metrics in policies

Module 14: User Access Control**Lessons**

- Recognize how users are authorized to access objects
- Determine privilege priorities when a user has multiple privileges
- Import users and user groups from an LDAP source

Module 15: Extending and Managing a vRealize Operations Deployment**Lessons**

- Identify the management packs that are available to your environment
- Install and configure a management pack
- Monitor the health of a vRealize Operations cluster
- Generate a support bundle
- View vRealize Operations logs and audit reports
- Perform vRealize Operations cluster management tasks
